Shihan Wu

Beijing Academy of Artificial Intelligence (BAAI) · Embodied AI Researcher
https://koorye.github.io/home/ · shihan.wu.koorye@outlook.com · +8615869663967

Personal Summary

Embodied AI Researcher at **BAAI**, M.Eng. in Computer Science from **UESTC** **(Top 1.3%)**, focusing on:
› Training and test-time adaptation of **embodied foundation models**; **large-scale robot manipulation datasets**
› Efficient transfer learning for **Vision-Language Models**; **prompt tuning** and **contrastive learning**
Published at **CVPR/ICLR/ICRA** (**300+** citations); **RoboCOIN** used by **360+ institutions**, **50M+ downloads**; reviewer for **NeurIPS/ICLR/TPAMI**; **National Scholarship**, **Outstanding Graduate of Sichuan Province**

Work Experience

Beijing Academy of Artificial Intelligence (BAAI) Embodied AI Researcher *Jun 2026 - Present*
› Leading a **large-scale multimodal egocentric dataset**; exploring **efficient learning paradigms** for VLAs

Beijing Academy of Artificial Intelligence (BAAI) Research Intern · Embodied AI *Jun 2025 - Jun 2026*
› Researched VLAs; led the **RoboCOIN** large-scale bimanual dataset and **hierarchical skill annotation**

Education

UESTC Master of Engineering in Computer Science and Technology *Sep 2023 - Jun 2026*
› **Academic Performance**: *GPA 3.94/4.0* | *Rank: 6/454 (Top 1.3%)*
› **Honors**: **National Scholarship**, **Sichuan Outstanding Graduate**, CCF YEF 2026 Best Presentation Award, etc.

UESTC Bachelor of Engineering in Software Engineering *Sep 2019 - Jun 2023*
› **Academic Performance**: *GPA 3.94/4.0* | *Rank: 18/181 (Top 10%)* | *CET-4/6: 579/467*
› **Honors**: **Outstanding Graduate**, "Shiqiang" Special Scholarship, Outstanding Student Scholarship

Research Publications

RoboCOIN: An Open-Sourced Bimanual Robotic Data Collection for Integrated Manipulation *Nov 2025*
› Led **20 institutions**: **15 embodiments, 180K+ trajectories**; used by **360+ institutions**, **50M+ downloads**

[ICLR 2026] *Policy Contrastive Decoding for Robotic Foundation Models* *Sep 2025*
› **Training-free policy contrastive decoding** across VLA architectures, achieving **+8%∼41% gains**

[ICRA 2026] *InSpire: VLA Models with Intrinsic Spatial Reasoning* *Sep 2025*
› **Spatial reasoning** reduces **spurious correlations** in VLAs; gains on seen **(+6.2%)** and unseen **(+10%)** tasks

[CVPR 2025] *Skip Tuning: Pre-trained Vision-Language Models are Effective and Efficient Adapters Themselves* *Dec 2024*
› **Parameter-free** adaptation method, achieving **+1.04% accuracy** with **15× speedup** and **6.4× memory efficiency**

[CVPR 2024] *DePT: Decoupled Prompt Tuning* *Nov 2023*
› **Plug-and-play** decoupling method, providing **+0.67%∼2.65% gains** across prompt tuning baselines

Projects

Radar Signal Detection System · **Feature extraction** and **open-set detection** algorithms *Mar–Jul 2024*
Intelligent Driving Safety System · **Database design**, **distributed backend**, **containerization** *Apr–Aug 2022*

Awards

Meritorious Winner (International) · Mathematical Contest in Modeling (MCM) *Apr 2021*
National Bronze Award · China International "Internet+" Innovation & Entrepreneurship Competition *Dec 2021*
Provincial First Prize · Chengdu International Software Design and Application Competition *Oct 2021*
Provincial Second Prize · China Undergraduate Mathematical Contest in Modeling *Sep 2021*
Provincial Silver Award · "Challenge Cup" Sichuan College Student Entrepreneurship Competition *Jul 2022*

Technical Skills

Core Expertise: VLAs (OpenVLA, π_0, Octo), VLMs (CLIP, LLaVA), fine-tuning (Prompt Tuning, LoRA)
Languages: Python, Java, C/C++, C#, JavaScript, SQL, etc.
Frameworks: PyTorch, Scikit-learn, MMDetection, TensorFlow/Keras, JAX, etc.
Engineering: Web (Vue/SpringBoot), Databases (MySQL/Redis), DevOps (Docker), Game (Unity3D), Mobile
